Languages: Java, Python, JavaScript, SQL, C, C++

Frontend: HTML, CSS, Bootstrap, React (Basics)

Mobile: Flutter (Basics), Kotlin

Database: MySQL, Firebase

Tools: StarUML, Figma

Experience

Fresher

Projects

Portfolio Website (HTML, CSS, Bootstrap)

Designed and developed a responsive personal portfolio website to showcase projects, skills, and services. Built a mobile-friendly layout with clean navigation and optimized the interface for different screen sizes.

Data Management App (Kotlin, Firebase)

Developed an Android application that stores and manages data using Firebase. Implemented functionality to retrieve data, download it as a JSON file, and display the stored information within the app through a simple and user-friendly interface.

Student Record Management System (Java, DBMS)

Built a Java-based application to create, update, delete, and manage student records using database integration. Focused on CRUD operations, data handling, and structured backend logic.
